Subject: RIN 1210-AB33

Any attempt by the Fed government to impose or even start on the process of imposing any type of nationalization of my 401K plan will result in my immediate termination and withdrawal of the funds from the account. My personal investment accounts are exactly that – MINE. I demand the continued right to control the direction of these investments. The concept of forcing via regulation my participation in anything other than what I originally intended when opening the account is an unconstitutional attack on my personal liberties.

Fund your massive deficits through some other ruse and keep your hands off my 401k.

Michael Mathis
